

BOB CHROBAK
Vice President
Kennedy/Jenks Consultants
415-350-7802, BobChrobak@KennedyJenks.com

Mr. Chrobak has over 30 years of experience in project management and process engineering for water treatment, industrial water and wastewater treatment, air pollution control and soil remediation. He leads the Kennedy/Jenks' food and beverage practice, with an emphasis on providing engineering and scientific services for wineries and food processors. He has conducted numerous water conservation and source reduction studies including review of cleaning and sanitation practices for many wineries and food processors to reduce effluent volumes and constituent concentrations.
