

GLENN MCGOURTY
Farm Advisor UCCE
707-391-3003, gtmcgourty@ucdavis.edu

Glenn McGourty is the Winegrowing and Plant Science Advisor for the University of California Cooperative Extension Offices in Lake and Mendocino County. He received an AB degree in Botany from Humboldt State University in 1974. He received an MS degree in Plant Soil and Water Science from the University of Nevada Reno in 1979. Glenn joined UC Cooperative Extension in 1987, and works with wine grape growers, wineries, nurseries, landscapers and vegetable growers. Present research activities include evaluating 14 Mediterranean wine grape varieties; clonal trials of Sauvignon blanc, comparison of organic, biodynamic and conventional farming for their effects on wine grape and soil quality; and evaluation of cover crop species.
